

GOËMAR®

# MULTOLEO

Speciality Fertilizer for Boron

## GUARANTEED ANALYSIS

Boron (B) ..... 10%

Derived from: Boric Acid

Net Weight: 27.9 lbs. (16. 65 kg) Net content: 2.5 gal (9.46 liters)

Weight per gallon: 11.16 lbs. (5.06 kgs)

DISTRIBUTED BY: AGRIMAR, CORPORATION

5634 Atlanta Highway, Suite 200

Flowery Branch, Georgia 30542

800-638-6673

CAUTION: KEEP OUT OF THE REACH OF CHILDREN

CAUTION: This product contains boron, therefore must only be used on crops listed on this label at the recommended rates and according to the directions for use. The use of this fertilizer material on any other crops may result in serious crop injury.

# GOËMAR®

## MULTOLEO

CROP	DOSAGE	STAGE
Canola	1.5 p ts./acre	Beginning of stem elongation to separated flower buds.
Sunflower	2 pts./acre	From 3 pairs of leaves to first flower buds.
Flaxseed Sugarbeet	2 pts./acre 3 pts./acre	Before onset of flowering. 8 true leaves.

### PROPERTIES

Goëmar MULTOLEO is a liquid formulation, designed for foliar applications. It's composition is specific for canola, sunflower, flaxseed and sugarbeet. Multoleo aids in correcting boron deficiencies.

### DIRECTIONS FOR USE

SHAKE CONTAINER WELL, add Goëmar Multoleo to partially filled spray tank. Wash any residual Goëmar Multoleo into spray tank with remaining water. All other spray materials should be added prior to Goëmar Multoleo.

Goëmar Multoleo may be applied "dilute" for conventional ground foliar applications (50-500 gallons of water per acre), or "concentrate" for ground low volume or aerial applications (2-20 gallons of water per acre).

In the case of very alkaline spray water (pH 7.5 to 8.0), it is strongly recommended to use an acidifying agent or buffering agent to lower the pH of the mixture down to 6.5 - 7.0.

### INFORMATION

Goëmar Multoleo is a liquid boron formulation combined with Goëmar GA 142, for foliar application.

Goëmar Multoleo is suggested as part of a total nutrition program. Applications of Goëmar Multoleo may be particularly beneficial during periods of peak nutrient demand.

A good tissue testing program may be helpful to monitor and to maintain optimum plant growth and development.
