

GOËMAR®

Product **FABs**

MZ "O"

Goemar MZ "O" enhances bloom set, flower development and color, while promoting stronger, healthier plants. This unique product is classified as a physiological activator and can be foliar-applied on a wide range of ornamentals.

The benefits of Goemar MZ "O" have been related to its active ingredient--GA 142—which stimulates the metabolism of polyamines, natural compounds that enhance flower development.

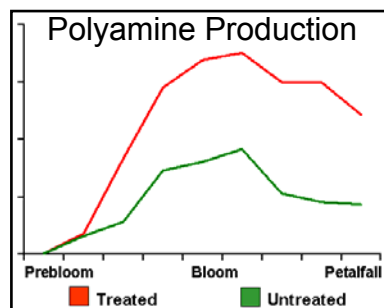

Pollination

- Goemar MZ "O" strengthens flower structures responsible for pollination.
- Stronger pollen tubes can provide for a more robust flower set and longer lasting color.
- Increases cell tube formation, which promotes more blooms.
- Increases plant health and sturdiness.

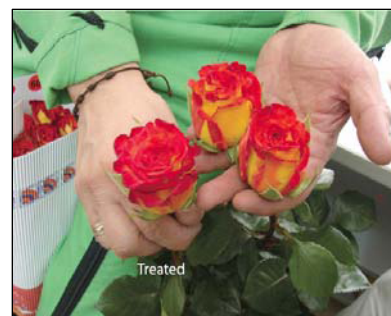

Polyamines

- Polyamines occur naturally in plants and stimulate a number of plant responses.
- Goemar MZ "O" enhances production of polyamines and other substances that are necessary for a wide range of metabolic reactions.

Photosynthesis

- Goemar MZ "O" is a unique blend of nutrients and GA 142 that promotes chlorophyll production.
- The nutrient and elicitor package in Goemar MZ "O" improves plant health, which results in fewer aborted flowers.
